KUBRA HQ is KUBRA's unified, AI-powered, cloud-native platform that brings together all of our billing, payments, and customer experience solutions under one scalable system. It serves as the foundation for KUBRA's products — from payments and alerts to portals and analytics — enabling clients to manage the entire customer communication and billing journey seamlessly.
As part of the **KUBRA HQ team**, the **Analytics Engineer** plays a key role in turning KHQ's data into meaningful insights for both internal teams and external clients. This role helps shape how business leaders, operations teams, and clients make data-driven decisions using trusted, real-time information from the KUBRA HQ platform.
This is a hybrid opportunity in **Mississauga, ON.**

How You'll Contribute

- Own a curated catalog of business metrics and KPIs, ensuring consistent definitions and alignment across products and clients.
- Design, build, and automate dashboards and reports in Power BI and Looker, backed by robust data de

detail.
- Conduct in-depth analysis to identify trends, drivers, and opportunities, providing actionable recommendations to business leaders.
- Automate recurring reporting processes (e.g., QBRs, client packages) using reusable datasets, templates, and semantic layers.
- Model, query, and transform data using SQL; maintain performant data pipelines, refresh schedules, and access controls.
- Collaborate with Data Science to support experiments and track ML/AI outcomes through production dashboards.
- Partner with cross-functional teams (Product, CXT, Finance, Client Success) to align metrics with company and client goals.
- Document analytical logic, KPI definitions, data lineage, and assumptions to enable self-service and knowledge sharing.
- Implement QA for data assets, including validation, regression testing, and monitoring for anomalies.
- Stay current with BI and analytics tools and best practices; recommend and adopt improvements that enhance reliability, performance, or usability.

Strengths That Shine in This Role

- 3–5 years of experience in data analysis and reporting, preferably within product or SaaS environments.
- Hands-on proficiency with SQL and Looker.
- Experience building end-to-end reporting solutions from data modeling to dashboard deployment and support.
- Familiarity with LookML, model/view development and performance tuning, data warehousing concepts and ETL/ELT practices; exposure to cloud platforms (AWS/Azure) is preferred.
- Experience collaborating with Data Engineering and Data Science teams; Python/ML/AI experience is an asset.
- Undergraduate degree in a related discipline (e.g., Computer Science, Statistics, Analytics, Mathematics, Engineering, Economics) or equivalent experience.
- Advanced certifications in analytics or BI tools are preferred.

Skills That Matter in This Role

- Excellent problem-solving, communication (oral and written), and data storytelling skills; ability to translate analysis into clear narratives and actionable business recommendations.
- Strong analytical skills with experience working with large and complex datasets; meticulous attention to detail.
- Familiarity with Python for advanced analysis and data manipulation.
- Ability to define and maintain KPIs and translate business questions into analytical requirements.
- Solid understanding of data governance, cataloging, and metric standardization.
- Excellent organizational and time management skills; able to manage multiple priorities under tight deadlines.
- Proactive, collaborative, and client-focused mindset with strong influence and impact skills.

This position is bonus eligible.
At KUBRA, we believe the workplace should be equitable, inclusive, and inspiring for every employee. In an effort to provide greater transparency, we are sharing the base salary range for this position. Actual base pay will be determined based on permissible factors such as transferable skills, work experience, market demands, and primary work location. The base pay range provided is subject to change and may be modified in the future.
In accordance with Ontario employment legislation, this job posting is for an existing open vacancy
KUBRA is an equal opportunity employer dedicated to building an inclusive and diverse workforce. We will provide accommodations during the recruitment process upon request by emailing recruitment-team@kubra.com. Information received relating to accommodation will be addressed confidentially. We thank all applicants for their interest; however, only candidates under consideration will be contacted.
#LI-AA1

While we value the skills and experiences listed in our job requirements, we also recognize that talent comes in many forms, and welcome applications from candidates who meet most but not all specified requirements. If you possess a strong desire to learn and grow in a dynamic work environment, apply now!

KUBRA is a fast-growing company that delivers customer communications solutions to some of the largest utility, insurance, and government entities across North America. KUBRA offers billing and payments, mapping, mobile apps, proactive communications, and artificial intelligence solutions for customers. With more than 1.5 billion customer interactions annually, KUBRA services reach over 40% of households in the U.S. and Canada. KUBRA is an operating subsidiary of Hearst.
Our office is small enough to allow creative individuals to flourish, yet large enough to provide long-term stability. We place a tremendous amount of responsibility on our team members to be productive, focused and self-motivated. We offer a casual work environment, competitive compensation and a stellar benefits program.

KUBRA does not typically provide immigration-related assistance, including employment-based work visa (e.g. H-1B) sponsorship, work permit applications and extensions, permanent residence (green card) sponsorship, LMIA applications or permanent residency nominations. Candidates must ensure they have legal authorization to work in the U.S/ Canada. All sponsorship determinations are case by case based on business need.
