Full job description

Salary Range: CAD $55,000 - $70,000

About Us:

ZenaTech (Nasdaq: ZENA | FSE: 49Q) is a technology company specializing in AI drones, Drone-as-a-Service (DaaS), enterprise SaaS, and quantum computing solutions for mission-critical business applications. Since 2017, the company has leveraged its software development expertise and expanded its drone design and manufacturing capabilities through ZenaDrone to innovate and enhance customer inspection, monitoring, safety, security, compliance, and surveying processes.

Position Summary

ZenaTech is seeking a **Junior RPA Developer** to design, deploy, and support robotic process automation (RPA) solutions that streamline UI-driven and rules-based tasks across the organization. In this role, you will work closely with the automation team and receive hands-on training in ZenaTech's systems while helping identify and automate repetitive business processes.

This is an excellent opportunity for an early-career professional looking to build expertise in RPA and enterprise automation within a fast-growing technology environment.

Key Responsibilities

- Design, develop, and maintain RPA bots using tools such as UiPath (preferred) or Automation Anywhere
- Automate repetitive, rules-based tasks across web portals, desktop applications, and internal systems
- Document bot workflows, exception handling logic, and deployment procedures
- Participate in user acceptance testing (UAT) and support successful bot rollouts
- Collaborate with Business Analysts to understand and document processes prior to automation
- Monitor bot performance, troubleshoot issues, and resolve failures in a timely manner
- Identify opportunities to expand automation coverage across business functions

Required Qualifications

- Bachelor's degree in Computer Science, Information Technology, or a related field
- 1-3 years of experience with RPA tools (UiPath preferred; Automation Anywhere or Blue Prism also considered)
- UiPath RPA Developer Foundation Certification, or willingness to obtain within 60 days of hire
- Understanding of UiPath concepts such as selectors, workflows, sequences, and data manipulation
- Strong attention to detail and ability to analyze manual processes for automation opportunities

Nice to Have

- Experience with UiPath Orchestrator for bot scheduling and monitoring
- Basic scripting knowledge (e.g., VBA, Python, or JavaScript)
- Familiarity with OCR tools such as ABBYY or UiPath Document Understanding
- Experience working in a startup or high-growth technology environment

"We are an equal opportunity employer committed to employment equity utilizing hiring practices on merit and business needs. We encourage applications from women, Indigenous peoples, persons with disabilities, members of visible minorities and all others of legally protected status."

Job Type: Full-time

Pay: $55,000.00-$70,000.00 per year

Application question(s):

- Are you legally authorized to work in Canada?
- This is not a remote position, can you be in office or on test site (Within the GTA) 5 days a week?
- This position requires a portfolio of sample work please provide a link here or on your resume:

Licence/Certification:

- Driving Licence (required)

Work Location: In person
