**Meitou Inc.** is a dynamic financial startup located in Toronto, Canada, dedicated to serving Chinese-speaking investors with expert U.S. stock analysis and insights. Our flagship product, **Meitou (jdbinvesting.com) and its App (美投App)**, is an internet-based financial info sharing platform. We have built a strong community of over 1M global investors, delivering top-quality financial content and analysis to empower investors' every decisions, and we are striving to assist every of investors all over the world.

**Summary**

We are seeking an experienced and highly motivated Senior Mobile Application Engineer to join our dynamic product development team. This role is crucial for scaling our flagship mobile application **美投App**, requiring a strong foundation in both cross-platform development (React Native) and native mobile architectures to ensure high performance, maintainability, and quality.

**Key Responsibilities**

- **Develop & Innovate:** Lead the development, testing, and deployment of new features for our mobile

Easy Apply

- **Architecture:** Design and implement robust, scalable, and maintainable application architecture (e.g., Redux/Zustand, MVVM patterns).
- **Performance & Optimization:** Identify and resolve performance bottlenecks within the JavaScript layer and the bridge. Conduct code reviews and ensure high code quality.
- **Native Integration:** Develop, integrate, and maintain custom native modules (**iOS/Android**) to extend React Native capabilities when required.
- **Collaboration:** Work closely with product managers, UX/UI designers, and backend engineers to deliver a seamless user experience.
- **Mentorship:** Provide technical guidance and mentorship to junior team members.

**Required Qualifications**

- **Experience: 5+ years** of professional experience in mobile application development, native or hybrid.
- **Native Development (Mandatory):** Solid, proven experience in **native iOS development (Swift/Objective-C)** and/or **native Android development (Kotlin/Java)**.
- Ability to read, understand, and debug native codebases is a must.
- **Language:** Proficient in **JavaScript (ES6+)** and **React** ecosystem.
- **Tools:** Experience with state management libraries (e.g., Redux Toolkit, MobX, or Context API).
- **Engineering Best Practices:** Familiarity with mobile testing frameworks (Jest, Detox, Appium) and CI/CD pipelines (e.g., Fastlane, Jenkins).

**Bonus if you offer**

- **TypeScript Preference:** Strong preference for candidates who have experience developing large-scale React Native applications using **TypeScript**.
- **ReactNative and Expo:** This is what we use right now
- **Modern UI:** Experience with modern native UI frameworks (e.g., **SwiftUI** or **Jetpack Compose**).
- **Architecture:** Prior experience working with micro-frontend or module-based architectures in mobile apps.
- **Backend Knowledge:** Understanding of RESTful APIs, GraphQL, and offline storage solutions.
- **AI Power**: Solid experience in AI-powered development engineer practice

**What We Offer**

- Competitive salary and comprehensive benefits.
- Comprehensive medical plan.
- Opportunities to work on cutting-edge projects with ample room for personal growth and development.

We foster a work culture where autonomy and ownership are paramount. You will have the chance to take full responsibility for your projects—from design to implementation—and see how your decisions impact the product's success. If you are passionate about technology, eager to tackle backend development challenges, and excited about working in a growing team, we would love to hear from you!
